Top Item Spend

Spend Concentration:

56.2% of total procurement spend is concentrated in Electronics.

Management implication:

Electronics should be prioritized for sourcing and cost-optimization initiatives

Item Concentration:

Laptop is the highest-spend item at approximately \$472K.

Management implication:

Prioritize high-value items for price benchmarking and contract negotiations.

Supplier Concentration:

The largest supplier accounts for 26.5% of total spend.

Management implication:

Review supplier dependency and assess alternative sourcing opportunities.

Finding	Business Impact	Recommended Action	Dynamic Priority
Category Concentration	56.2% spend in Electronics	Review category sourcing strategy	High
Item Concentration	Laptop spend approx. \$472K	Benchmark prices and renegotiate	High
Buyer Distribution	Top buyer represents 7.8%	Monitor buyer workload allocation	Low
Supplier Concentration	Top supplier represents 26.5%	Assess alternative suppliers	Medium
